

Generation Energy

### Advantages:

Maintains a healthy energy efficient home

Proper attic venting promotes a better material life and reduces HVAC load

Attic venting will increase fresh air circulation

Full operational right out of the box  
Temperature switch on at 80\* off at 70\*

No electrical wiring needed and  
Install takes less than an hour

Limited 25 yr. Lifetime Warrantee

30W panel-1550cmf, 2500sqft

## Overview

Attic temperatures can reach more than 140 degrees. Trying to cool your home can be a heavy load on A/C systems. When stapled to the attic roof rafters you will see noticeable energy savings while increasing your homes overall comfort. A solar attic fan can reduce the effects of environmental stresses and extend the life of the building materials and reduce the A/C systems use. Insulation isn't enough try using our Heavy-duty radiant barrier!

**PRICING-- 1-9 @ \$278/FAN**

**10-19 @ \$268/FAN**

**Pallet-PLUS @ \$258/FAN**

## Specifications

GENERATIONAL ENERGY / INTELLIBREEZE® Solar Attic Fan

SIZE-30 Watt Solar panel

COLOR-Powder Black

ROOF MOUNT

MODEL-SAF 30 W Solar Attic Fan-Black

VENTING CAPACITY-1550 CFM's and 2500SqFt attic space

MOTOR-Germain Engineered whisper quiet, high torque, variable speed, brushless DC motor

PANEL-High Impact photovoltaic 30W panel mounted on an adjustable bracket

HOUSING- 1100 series Commercial pure grade aluminium, powder coated inside and out to resist natures elements

FAN BLADE- Upgraded High Strength UBS plastic 4 Blade Fan, lighter, lower vibration and noise, and more output than a 5 blade aluminium fan blade and will not bend or ding during installation to cause unwanted vibration

FLASHING- 1100 series Aluminium flashing with no seams for a tight seal and rounded edges to minimize damage to the roof shingles and withstand constant environmental stresses

WEIGHT- 25lbs. All inclusive material, everything out of the box install, with flashing sealant and 2 temperature switches
