Intelli-Vac
"Vacuum Insulation Removal Bags"

For Attic insulation removal
Used by spray foam and pest
control professionals

Intelli-Vac

Overview

Constructed using a polypropylene woven material for high strength and tear resistance that are 40% stronger. 2 different sizes for flexibility and logistics.

The standard 75cubic ft bag has the capacity of more than 350+ lbs and the filled size is 4ft. x 6 ft. with a collar that is large enough to be ambiguous to insulation vacuums. The large 120cubic ft bag has a capacity of more than 550+ lbs plus and filled size is approximately 5ft x 8ft. Just roll and stack neatly on trailer. Easy to seal shut and transport.

Specifications

- Made of a polypropylene woven material
- 10 bags to a box at 12 x 12 x 4 inches per bag
- 2 different sizes, a white 75 cubic ft and a black 120 cubic ft of material storage
- High strength and tear resistant
- Size of inlet allows to be ambiguous to many different brands of vacuums
- Stacks neatly for transport
